

# HTTP API Documentation

## Introduction

This HTTP API reference guide will help you to use our push platform to send SMS message through query string over HTTP. This document provides the necessary information related to the interface.

### Assumptions

- User will make sure that they will not send duplicate mobile number in the same hit.
- User will send message to maximum 200 mobile numbers at a time.

## Single SMS

<http://makemysms.in/api/sendsms.php?username=xxxxx&password=xxxxxx&sender=xxxx&mobile=xxxxxxxxx&type=x&product=x&message=xxxxxxxxxx>

### Response

|         |  |
|---------|--|
| Success | {"code":201,"status":"Success","message":"Message sent successfully","job_id":"631200030"} |
| Error   | {"code":404,"status":"Failed","message":"User not found."}                                 |

## **Multiple SMS**

<http://makemysms.in/api/sendmultiplesms.php?username=xxxxx&password=xxxxxx&sender=xxxxxx&mobile=xxxxxxxxx,xxxxxxxxx&type=x&product=x&message=xxxxxxx>

### **Response**

|         |  |
|---------|--|
| Success | {"code":201,"status":"Success","message":"Message sent successfully","job_id":"631200030"} |
| Error   | {"code":404,"status":"Failed","message":"User not found."}                                 |

## **Unicode SMS**

<http://makemysms.in/api/sendsms.php?username=xxxxx&password=xxxxxx&sender=xxxxx&mobile=xxxxxxxxx&type=x&product=x&message= नमस्ते>

### **Response**

|         |  |
|---------|--|
| Success | {"code":201,"status":"Success","message":"Message sent successfully","job_id":"631200030"} |
| Error   | {"code":404,"status":"Failed","message":"User not found."}                                 |

## **Job ID Details**

[http://makemysms.in/api/jobiddetails.php?username=xxxxx&password=xxxxxx&job\\_id=XXXXXXXXXX](http://makemysms.in/api/jobiddetails.php?username=xxxxx&password=xxxxxx&job_id=XXXXXXXXXX)

### **Response**

|         |  |
|---------|--|
| Success | <pre>{"code":201,"status":"Success","message":"Job id details found.,"submitted":0,"delivered":1,"failed":0,"job_id_details":[{"job_id":136301149,"Sender":"MOBSFT","count":1,"message":"hello+vedant","mobile":"918108004545","status":"DELIVERED"}]}</pre> |
| Error   | <pre>{"code":404,"status":"Failed","message":"job id details not found."}</pre>  |

## **SMS Balance Details**

<http://makemysms.in/api/balanceapi.php?username=xxxxx&password=xxxxxx>

### **Response**

|         |   |
|---------|---|
| Success | <pre>{"code":201,"status":"Success","message":"User balance details found.,"available_balance":{"transactional_balance":999,"promotional_balance":0}}</pre> |
| Error   | <pre>{"code":404,"status":"Failed","message":"Balance details not found."}</pre>  |

## **Sent Message Report**

<http://makemysms.in/api/sentreportapi.php?username=xxxxx&password=xxxxxx&product=x&date=yyyy-mm-dd>

### **Response**

|         |  |
|---------|--|
| Success | <pre>{"code":201,"status":"Success","message":"Sent sms details found.,"submitted":0,"delivered":14,"failed":4,"report_details":[{"job_id":82013252,"Sender":"MOBSFT","count":1,"message":"Test","mobile":"918108004545","status":"DELIVERED"}]}</pre> |
| Error   | <pre>{"code":404,"status":"Failed","message":"Sent SMS not found."}</pre>  |

## **SMS Parameters Details**

| <b>Parameter</b> | <b>Details</b>   | <b>Example</b>              |
|------------------|--|-----------------------------|
| username         | Unique username assigned to user at the time of account creation. Username can only contain alphabets or numbers, with no blank spaces or special characters.  | Abcd, abcd2                 |
| password         | User's password  | *****                       |
| sender           | User's approved sender ID  | ABCDEF, QWERTY              |
| mobile           | Mobile numbers to which you want to send SMS. You can add mobile number with or without country code (91). Do not add '+' sign in front of country code. Add multiple mobile numbers separated by comma (,). | 1234567890,<br>911234567890 |
| type             | Type parameter indicates type of message i.e. text or Unicode.<br><br>1 - Plain text<br>2 - Unicode  | type=1                      |
| product          | Product parameter indicates type of product i.e. transactional or promotional.<br><br>1 – Transactional<br>2 - Promotional   | product=1                   |
| job_id           | This parameter indicates job id number of which you want to get information.   | job_id=784512639            |
| date             | Date parameter indicates date of which you want to get sent SMS report. Date parameter should always in yyyy-mm-dd format.   | Date=2017-11-12             |
